

# TOMMY TAYLOR

## Web Developer Role

### MY PROFILE

I'm a Front End Web Developer whose goals are to complete the Front-End Development Stack. I'm capable of coding to an industry standard level, although I'm still progressing towards being proficient in the React.JS framework.

### CONTACT ME

#### Address:

Theydon Bois, Epping, Essex

#### Phone:

+44 7917 660 960 (Personal)

### FRONT END SKILL TREE

### FRONT END SKILL BREAKDOWN

Capable of writing clean, commented semantic HTML.

Can use CSS and layouts - Box model, Grid and Flexbox.  
(I'm very proficient with CSS Grid)

I also use SCSS for my styling and I use BEM naming practices.

Able to code responsive design and use media queries. I'm also able to use the Bootstrap CSS framework.  
(fairly proficient)

I use Git for my version control systems along with Github. I have a fine understanding of Node.JS - I can use npm package manager, build tools (npm scripts and gulp) as well as task runners (webpack and parcel)

### CODING EXPERIENCE

#### Python - matplotlib, Data Analysis

2016-2017

##### Solo Project

A financial KPI and equities market HUD - My goal was to take financial data and turn it into tangible information with charts. I achieved this goal gaining insight on the financial health of listed companies, making it easier to read fundamental analysis when investing.

#### Block Webpage Development

2017

##### Harlow College Assignment

We had to build a business from scratch this included the website. It was my first true introduction into the world of front end development

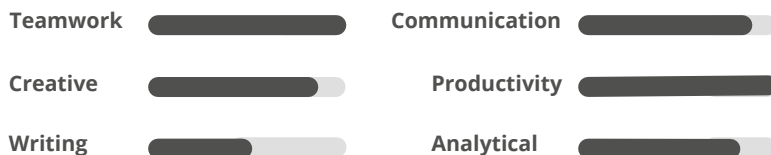

#### Front End Web Developer

2020-Current

##### Freelance

I learnt to code and deploy frontend projects, using HTML, CSS (SCSS) With basic JavaScript Syntax usage. I also learnt to use UI, UX software such as Figma and Adobe XD

### PERSONAL SKILL

### EDUCATIONAL BACKGROUND

Debden Park High School

2010-2015

Extended Business D\*D\*D\*

Harlow College

2015-2017

Front End Web Developer

## THANK YOU

For Accepting My Cover Letter

“

learn, fail, learn again as long as you don't make the same mistake twice - you'll see progression.

## TO WHOM IT MAY CONCERN

***Within completion of the first year you will have a React.JS developer on your team. Currently I have been working on fine-tuning my JS skillset and I'm put my own personal time into seeing my goal achieved.***

I struggled to find a career path which I was passionate about, I wanted something I knew I could excel in but was still challenging. I always saw coding as a hobby so I never really thought about taking it up as a career path, until I met my sister's boyfriend, who's a React Front End Web Developer.

This really changed my outlook, I went from treating web development as a hobby to actually trying to make a career of it. He mentored me, adapting the way I code. This pushed me to be more of an industry standard developer so I could land a junior / apprentice role. I want to work with a company who I can grow with and work toward my goals with at the same time. I'm mature, hungry and driven to take this step and If given the opportunity I know I can complete the Front End Stack.

### **A bit about me...**

I'm very cool headed, so strict deadlines or intensive workloads wouldn't disrupt my work efficiency.

Since coding is a passion of mine I will be taking the initiative when it comes to my work. I believe stepping up then doing what needs to be done will also maintain a good work balance which only boosts team efficiency.

I'm a very friendly, proactive individual who approaches life with an open mindset. I enjoy tackling problems and I pride myself as somebody who you can rely on, I will always be playing my part within the team even if that's simply communicating well among us.

Sincerely,

*Tommy J. Taylor*

Front End Web Developer
